Roll-up C-Signs™

Vertical-batten permanently riveted to back of sign.

Horizontal Lock-Pockets™ riveted to back of sign with (4) rivets; clear reinforcing on front.

Horizontal batten center riveted to vertical batten with three washers for smooth operation.

Roll-up C-Signs™ available in all grades of reflective or non-reflective materials.

All USA-SIGN® roll-up signs are shipped permanently assembled for trouble free use.

Specify material grade, size, and legend.

Roll-up C-Signs™ are designed for use on all Compact C-Stands™ (with "half-mast" and roll-up sign attachment), such as USA-SIGN® C-102, C-202 and C-902 [below].

All USA-SIGN® signs and sign stands shown are FHWA, NCHRP-350 Accepted

Compact C-Stands™ for Roll-up C-Signs™

Model C-102

Non-Flex mast
Galvanized Steel Construction

Model No. C-102

Compact C-Stand™ is rated for 65 mph two-lane highways with 36" Roll-up C-Sign; up to 50 mph with 48" Roll-up C-Sign™.

Model C-202/902

Super-Flex™ Mast
C-202, Galvanized Steel Construction
C-902, Aluminum Construction

Model No. C-202/C-902

Compact C-Stands™ are high performance, heavy-duty stands utilizing the Super-Flex™ adjustable fiberglass leaf-spring. For all Roll-up C-Signs™.

Super-Flex™ C-Stands™ highway rated for 55-65 mph.

Super-Flex™ Fiberglass Leaf-Spring

"Adjusts" by moving C-Sign™ up or down for proper wind-deflection. This patented system allows both the half-mast and C-Sign™ to deflect together when hit by the force of wind - allowing sign to always maintain best visibility, never hinging-down, out-of-view, like other systems.

C-902 shown

Super-Flex™ Compact C-Stands™ quickly set-up and adjust sign height and wind-deflection for best "target value" and proven "blow-over" resistance.

Sign Stands for Rigid and Roll-up Signs

Model E-350

Econo-Stand™
Galvanized Steel Construction
Use with Rigid or Semi-Rigid signs

Model E-380

Econo-Stand™
Galvanized Steel Construction
Use with Rigid, Semi-Rigid, or Roll-up signs.

Model X-550 Series

Mid-level Interstate™ Series
X-Stands™ display rigid or roll-up signs from 15" to 60" above grade.

Interstate X-Stands™ feature dual-spring wind-deflection using two heavy-duty steel coil-springs with galvanized steel legs and mast.

X-550 Series Interstate™ Stands are rated up to 70 mph on two-lane or four lane highways.

Use with Rigid, Semi-Rigid, or Roll-up signs.

Truck-Mount Brackets

Easy to install, inside or outside of truck, truck-mount brackets make storing stands easier and more convenient than ever.

Custom brackets available (made to order) for specialty applications.

Pole-Transporter Kits™

Strobe Transporter Kit™

Kit No. FC-2150-200SD

- 1 each: FC-150-HD Clamp
- 2 each: FROM-124/36 Fluorescent Red/Orange Mesh Warning Flags
- 1 each: UM-200SD-PL Strobe Light, Amber Lens, Hex-Head Bolt, External ON/OFF Switch
- 2 each: 6-VB 6-volt Batteries Heavy-Duty, Spring-Terminal

Day/Night Transporter Kit™

Kit No. LC-2250-RM-102

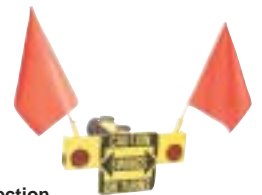

- 1 each: LC-250-HD Clamp
- 2 each: FROM-124/36 Fluorescent Red/Orange Mesh Warning Flags
- 1 each: RM-102-PL Rear-Mount Light, Red/Amber Lens, OFF/FLASH/STEADY-BURN External Switch
- 2 each: 6-VB 6-volt Batteries Heavy-Duty, Spring-Terminal

Folding Light-Bar Kit™

Kit No. FLB-2700

- 1 each: FLB-700 Folding Light-Bar
- 1 each: PWS-18-EG/ABS Pole Warning Sign™
- 2 each: FROM-124/36 Fluorescent Red/Orange Mesh Warning Flags
- 1 each: 4-Pin cable connection (to connect pre-wired lights to cab)

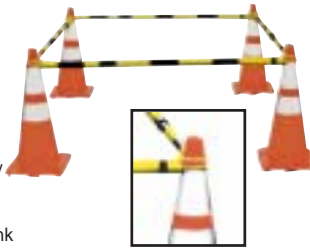

USA-CONES™

A complete line of fluorescent orange traffic cones. Choose from trim-line and regular sizes, with or without reflective collars. Injection-molded one-piece PVC construction ensures for structural superiority and extended life.

Safety Cone-Bar

Designed to use with our PVC cones; each section adjusts from 3 to 6 feet in length. Complete with yellow reflective surface for maximum visibility day or night. Extremely light-weight, portable, and easily carried or transported in car trunk or truck-bed.

Barricade Tape

Choose from a wide variety of legends. Rolls are 1000' (length) x 3" (wide).

Visi-Flares™

Visi-Flare™ 8.1

Safer than strike flares
8 hour battery life with 2 "C" cells
(base sold separately)

8.1

WP

Visi-Flare™ WP

Waterproof up to 330 ft depth
16 hour battery life with 2 "D" cells
8 hour battery life with 2 "C" cells
(base sold separately)

Barricade Lights

670 Visi-Flash
Choose FLASH or STEADY-BURN/FLASH

670

672

672 Visi-Flash Dome
(360 degree flash)

Safety Vests

- Economy
- General purpose
- Heavy-duty with reflective striping

Barricades

Type I, II, and III Barricades available.

Manhole Guards

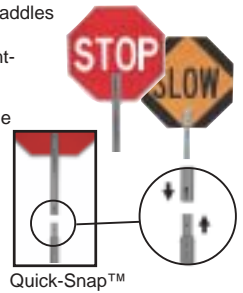

Manhole Guards create temporary barriers to keep traffic and pedestrians away from underground facilities. 1-1/4" welded steel-pipe with bright yellow safety finish; double safety-chain closures on "open-side" to prevent unwanted entry.

STOP/SLOW Paddles

Our all-plastic STOP/SLOW Paddles (Flagger-Helpers™) are non-corrosive, non-conductive, light-weight, and impact-resistant.

Staff attaches to paddle-handle with our easy-to-use Quik-Snap™ connection. No fragile "pins" or weak plastic threads to break-off or "cross-thread".

Quik-Snap™

Fuse Lock-Out/Tag-Out

A "must-have" Safety Device. Attaches to fuse-closure to prevent accidental re-activation of power.

Simple to install.

Custom printing available, with or without company logo.

Utility Signs

Identify your facilities or substations. Utility Signs and Decals are available with standard messages, custom messages, and corporate logos.

Phone Signs

Full line of phone signs. One-piece, double-sided .080" rigid aluminum signs. 12", 18" or 24" square, with optional 2" flange, for mounting to walls, posts, or poles. Standard or custom legends in reflective or non-reflective finishes available.

Cable Route Signs

Identify cable routes, directions, and locations.

Available in a variety of sizes and applications for marking overhead or underground utility or telephone cable.

Utility Line Markers

A wide range of specialty markers with customized messages and company logos are available.

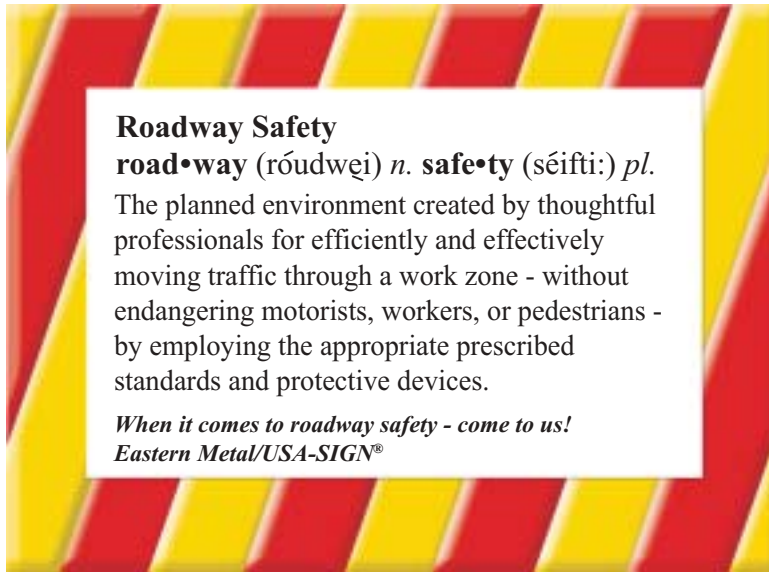

OSHA Signs

Hazard and Safety Signs and Decals available in a variety of standard sizes and colors. Standard or custom legends are available on .040" aluminum with baked enamel finish.
