

Roll-up Signs

Roll-up Warning™, C-Signs™, and Rigid Roll-up™

Roll-up signs manufactured by Eastern Metal/USA-SIGN® are the industry leaders by which all other roll-up signs are measured. We offer the most configurations, the most standard features, and the most reliability and ease of use. Ours are the best roll-up signs available

Roll-up Warning Signs™ are designed for "generic use" on all traditional sign stands (stands with complete vertical mast and roll-up sign-holder), including USA-SIGN® X-550 and X-600 Interstate™ Series sign stands. Roll-up Warning Signs™ are equipped with 3/16" vertical-batten and 3/16" horizontal-batten.

Roll-up C-Signs™ are designed for use on all "compact" sign stands (with "half-mast" and roll-up sign attachment), such as USA-SIGN® C-100, C-200 and C-900 Compact C-Stands™. Our C-Signs™ are equipped with 3/8" vertical-batten and 3/16" horizontal-batten, which dramatically improves sign display in windy conditions.

Rigid Roll-up™ Signs' maximize your roll-up signs visibility with stronger, more rigid battens than found on "other brands". Rigid Roll-ups™ work with full-masted stands (e.g. USA-SIGN® X-550 or X-600 Interstate™ Series), and are also the perfect roll-up for our Compact C-Stands™. Rigid Roll-ups™ are equipped with 3/8" vertical-batten and 5/16" horizontal-batten.
